Dear Rob,

As you are well aware we have 2 of your presses and we are thrilled with the dependability, speed and efficiency these machines add to our operation. Our ability to utilize the capability of your machines along with our make ready process enables our set-up time to be very quick. Our ability to utilize the Crest machines to their fullest makes our die cutting a competitive advantage. Set-up time is fast and enables us to be competitive in all of our bids. In fact, we often get asked to simply machine parts for other printers. Thanks for supporting a solid product. When we need another press, we will come to you.

Kind Regards:

William J. Betteridge  
President
